ARTISANS OF OPEN SOURCE

Crafting open source solutions that generate business results

Businesses, government agencies, non-profits and other organizations face significant workplace challenges as they strive to meet the rapidly growing need to manage thousands, and sometimes millions, of documents, while increasing productivity through effective content management and collaborative knowledge

sharing. To gain a competitive advantage, organizations must empower employees and other internal and external stakeholders with the tools they need to perform, compete and innovate—all while lowering costs and minimizing IT impact.

For many, traditional approaches to content management and

For Kaplan, end-user publishing capability and rapid content delivery result in streamlined operations and improved productivity

collaboration software solutions from proprietary vendors are often expensive, difficult to deploy and costly to maintain. And many of today's legacy content management systems were built well before most institutional IT infrastructure components and standards that we now take for granted were developed. The bottom line is that the lack of content management and collaboration facility in most organizations often leads to miscommunication, lost information, inefficient workflow and missed opportunities.

Rivet Logic—Extending content management, collaboration and community capability through open-source innovation

Rivet Logic addresses today's workplace challenges with open source content management, collaboration and community solutions that enable organizations to transform traditional content and channels of communication into dynamic, collaborative work environments. Rivet Logic combines the flexibility of open source with strategic insight and deep technical expertise to deliver numerous benefits, including accelerated end-user adoption, increased productivity, optimal business value, and lower costs through zero licensing fees and no forced upgrades or vendor lock-ins.

Rivet Logic Solutions

Enterprise Collaboration and Community — Transform knowledge sharing into enterprise-wide advantages

Rivet Logic addresses today's internal workplace challenges with Enterprise Collaboration and Community Solutions that

enable organizations to transform traditional, disorderly shared drives into dynamic, collaborative work environments. By connecting employees with each other through portals and other content-rich open source collaboration and community-building tools, Rivet Logic helps increase workflow efficiency, facilitate knowledge sharing and, ultimately, drive innovation.

Web Collaboration and Community—Extend communication capability through flexible Web-based functionality

Rivet Logic empowers today's workforce with Web Collaboration and Community Solutions that enable organizations to extend communication and knowledge-sharing activity beyond the boundaries of the enterprise in ways that facilitate external relationships, encourage innovation and drive business value. Through open source portal and extranet integration, social media capability, and user-generated content management and delivery, Rivet Logic's solutions yield dramatic results, including greater organizational efficiency, more effective customer service and outreach, and lower IT costs and resource utilization.

Enterprise Content Management—Increase productivity through flexible, rapidly deployed solutions

Rivet Logic enables organizations to transform traditional content repositories and static intranets into dynamic, collaborative work environments through an array of open source functionality. Through effective digital content management, streamlined workflow, optimized search and retrieval capability, and social media integration, our Enterprise Content Management Solutions provide business end-users with the tools and access they need to innovate, while easing the burden on IT departments.

Web Content Management—Simplify and accelerate Web publishing beyond the boundaries of the enterprise

Rivet Logic's Web Content Management Solutions simplify Web page maintenance by enabling business end-users to quickly generate, manage and publish a wide array of content without the need for sophisticated technical knowledge. Whether you are migrating from a legacy Web content platform or developing an open source platform from the ground up, our Web Content Management Solutions increase collaboration across the enterprise, facilitate quick access to timely information and enable high-performance Web content delivery.

Featured Partners

As an Alfresco Professional Services Partner, Rivet Logic offers expert architectural design, customization, integration and support services.

As a Certified Systems Integrator for JBoss, Rivet Logic enables customers to leverage deep expertise in service-oriented architectures and open-source applications.

Rivet Logic also provides expert support and consulting services for Red Hat's JBoss Enterprise Middleware. As a Red Hat Advanced Business Partner, Rivet Logic helps clients design, develop, integrate, orchestrate and deploy next-generation enterprise applications.

As a Preferred Partner for Liferay, Rivet Logic offers deep Liferay Portal expertise. Our portal solutions provide a robust, easy-to-maintain and cost-effective alternative to proprietary applications.
